

Divakar Reddy Velagacherla

Software Engineer | Java | Microservices | AWS

USA (Open to Relocation) | divakaravelagacherla@gmail.com | +1 5125668620 | LinkedIn | GitHub

Technical Skills

Languages: Java, SQL, Python, Go, React (Basic)

Databases: MySQL, Postgres

Frameworks: Spring Boot, Spring Security, Hibernate.

Cloud: AWS (EKS, ECS, S3, CloudWatch, Lambda, RDS Aurora)

Enterprise Tools & Monitoring: GitHub, Splunk.

Microservices & Architecture: RESTful APIs, GraphQL APIs, Microservices, Enterprise Architecture Best Practices.

Testing & Code Quality: JUnit, Mockito, CI/CD Testing Pipelines.

Familiar With: Docker, Kubernetes, Jenkins, CI/CD Pipelines

Professional Experience

Vanguard - Hybrid | Software Engineer (Java) | March 2024 - present

- **Developed and deployed microservices using Java (Spring Boot)** on AWS, integrating with PostgreSQL, DynamoDB, and S3 for secure, scalable data processing.
- **Designed GraphQL APIs backed by Spring Boot services**, enabling efficient client data retrieval and reducing query complexity.
- **Implemented caching strategies (Redis/DB-level)** to optimize response times and reduce repetitive database calls.
- **Built event-driven workflows** using AWS Step Functions and Lambda integrations, ensuring end-to-end process visibility and error handling.
- **Enhanced observability and reliability** by integrating AWS CloudWatch and X-Ray for monitoring, debugging, and performance tracking across distributed services.

Cognizant Technology Solutions - Pune, India | Java Backend Developer | July 2020 - December 2021.

- **Refactored legacy monolithic applications into Spring Boot microservices**, reducing deployment time by **30%** and enhancing system scalability.
- **Maintained CI/CD pipelines**, automating testing processes and reducing manual intervention by **60%**.
- **Implemented performance tuning techniques** to improve system reliability, reducing response time by **45%**.
- **Provided code review feedback and debugging solutions**, decreasing production defects by **40%**.

Sansbound Solutions - Chennai, India | Network Infrastructure Intern | January 2019 - April 2019

- Configured and troubleshooted **Cisco routers & switches** using CLI for network optimization.
 - Gained hands-on experience in **IPv4/IPv6, VLANs, and routing protocols (RIP, OSPF, EIGRP)**.
 - Conducted **network performance testing** and assisted in troubleshooting connectivity issues.
-

Education & Certifications

M.S. Computer Science – University of North Texas, USA (2023)

B.Tech Computer Science – SRM IST, India (2020)

GitHub Foundations Certification – GitHub (2024)

Go - The Complete Guide – Udemy(2025)
